Connect the world by our pallets

Policy

1. Connecting the world through our pallets

Based on our motto of "quality first, safety, speed, and low prices," our company supplies pallets and other distribution products. We ceaselessly supply environmentally-friendly products and services lead by our recyclable wooden products.

2. Protecting the environment is our corporate mission

From an environmental perspective, wooden pallets are an outstanding distribution material. The company conducts environmentally-friendly management based on our wooden distribution products.

Corporate Philosophy

Through corporate activities, our employees work together and contribute to sustainable growth of our company by achieving improved customer satisfaction and improved environmental quality.

Greeting

Connecting the world through our pallets; People, time, and goods; Moving forward from our 50th anniversary

Founded in 1972, our company started from yard operation for ship-building companies. From there, in conjunction with the growth of the local Keiyo Industrial Zone, our company entered into pallet manufacturing, packaging, and warehouse operations. In order to meet customer requests for quality, prices, etc., we expanded our product lineup from wooden to steel products, and from pallets to other logistics equipment. We have also expanded by establishing four companies in China, two companies in Vietnam, one company in Indonesia, and one company in the United States.

Moving forward, our distribution will span from Asian countries to countries throughout the world. We expect further demands for distribution quality and efficiency. Our company will continue to address customer needs head-on, supplying products and services which solve related issues.

In 2022, our company will celebrate our 50th anniversary. We value the "people, time, and goods" which are the foundation of management. Personally, I will push forward with company business so that our company will continue to be essential to our customers. From our 50 anniversary, our employees will join together to achieve even greater things in the future.

Masato Yashiro, President

Our Feature

How have we maintained top sales in the logistics equipment field since our founding in 1972 ?

Chiba Sogyo has continued to support the distribution which is the core of our economic activities. Ever since our founding, we have constantly led the logistics equipment industry.

“How can we satisfy customer needs to the greatest possible extent?”

—To achieve this goal, we have accumulated knowledge and expertise, and then steadily incorporated this wisdom into our services.

Our Service

- Wooden pallets (products, sales, repair)
- Wooden frame packaging
- Plastic pallet (sales, washing, repair)
- Sales warehouse
- Import pallet (manufacturing, sales)
- Steel logistics equipment (manufacturing, sales)
- Ship-building (manufacturing, sales)

How can we best serve our customers ?

Trust and performance of more than 45 years of establishment

Since our establishment in 1972, Chiba Sogyo has conducted on-site learning for responding to the needs of customers. We have continued to grow together with our customers while accumulating knowledge and expertise. Even today, our company is highly recognized due to our accumulated experience and, more than anything else, our desire to respond to customer needs. For the past 45 years, we have been loved by our customers. Moving forward, we are committed to further growth and performance by utilizing our experience and expertise.

Merits of integrated manufacturing and sales

Conducting internal factory sales enables our company to supply products/services at low prices and to enable smooth business transactions.

We also have factories in China and Southeast Asia. Furthermore, we have deployed locally-stationed Japanese employees to these factories. These measures enable us to respond to quality and prices demanded by customer.

Proposals for fulfilling customer needs

Direct meetings between customers and company staff enable us to provide products that are appropriate for customer needs. It also enables us to formulate product specifications which match the budget.

Support system for peace of mind

Company staff periodically visit our customers. In addition to checking for malfunctions and other problems in subsequent processes, staff construct systems for fast response to situations.

Factory

■ Chiba Head Factory

The main activities of the factory at the Chiba Head Office are the manufacturing and repair of wooden pallets, as well as the washing and repair of wooden frame packaging and plastic pallets.

The factory also consists of depots for rental pallets and a sales warehouse.

The total factory area is 20,000m².

Overseas Factories

Dandong City, Liaoning Province, China

Dandong Riqian Logistics Equipment Co., Ltd. (joint venture)

- Manufactured products: Steel boxes, racks, and other general steel logistics equipment
- Number of employees: 700
- Features: Pipe-building facilities for square pipes, several welding robots, automatic mesh welding facilities, five-system electroplating production line, powder coating line

Dalian City, Liaoning Province, China

Dalian Riqian Motor Co., Ltd. (joint venture)

- Manufactured products: Steel boxes, racks, other general steel logistics equipment, ship-building fittings
- Number of employees: 500
- Features: Large shot blast equipment, two powder coating lines, numerous welding robots

Dalian City, Liaoning Province, China

Dalian Yashiro Trading Co., Ltd. (overseas subsidiary)

- Features: As a Chinese sales subsidiary, mainly sells steel logistics equipment to Japanese corporations in China

Chuzhuo City, Anhui Province, China

Anhui Dongtai Metal Packaging Technology Co., Ltd. (joint venture)

- Manufactured products: Steel boxes, racks, and other general steel logistics equipment
- Number of employees: 150
- Features: Automatic pre-processing line, numerous welding robots

Hai Phong City, Vietnam

CS Vietnam Pallet Manufacturing Co., LTD. (overseas subsidiary *fully-owned)

- Manufactured products: Wooden pallets, plywood pallets, processed wooden products
- Features: Wooden processing facilities, manufacturing/sales of pallets for local Japanese corporations, quality management via deployment of Japanese supervisors

Ho Chi Minh, Vietnam

LUFA MECHANICAL CO., LTD (affiliated company)

- Manufactured products: Steel boxes, steel logistics equipment
- Number of employees: 150
- Features: Two electroplating lines, numerous welding robots

Indonesia (Sumatra)

P.T. AHLINDO PERKASA ALAM (affiliated company)

- Manufactured products: Tropical wood (MLH) products, household furnishings
- Features: Drying facility with an area exceeding 2,000m², wood processing equipment

Minnesota United States

CJK INTERNATIONAL HOLDINGS LLC (joint venture)

- Manufactured products: Steel boxes, racks, and other general steel logistics equipment
- Features: Joint manufacturing company among three companies in Japan, China, and Korea

At joint factories in China and an affiliated factory in Vietnam, we produce high-quality metal logistics equipment with outstanding merit. The equipment is then exported throughout the world.

Our affiliated company in Indonesia manufactures and sells high-durable pallets made from tropical wood.

Our local subsidiary in Vietnam manufactures and sells wooden pallets for local Japanese corporations.

Our Products <Steel Logistics Equipment>

Steel Logistics Equipment

We conduct planning, production, and sales by considering customer requirements for logistics equipment by constantly considering needs, quality, cost, delivery periods, and other perspectives with a focus on the future. Today, our business partners are expanding throughout the world and our company continues to receive high recognition.

Management of manufacturing processes and quality (Chinese production)

Educated quality managers including Japanese employees are assigned to each process in order to perform strict process management. The company has acquired ISO9001 certification and uses the certification to construct a system for managing manufacturing quality. From material processing to assembly (welding), surface processing (coating/plating), and shipping, the three Chinese factories achieve integrated production through 100% internal manufacturing. This enables management for supply at a level of quality, delivery, and cost expected by customers.

Example of product use

Boxes are designed in accordance with customer usage and product weight. The boxes can be stacked. They are used during storage, shipping, and exporting. When not in use the boxes can be nested for storage. This enables space-saving and efficient usage.

ISPM

For wooden pallets and wooden packaging used in shipping, it is necessary to perform heat processing in accordance with the international standards ISPM No. 15. Our company has acquired a license for ISPM No. 15. This enable heat processing in the specified location. As shown in the photograph, a stamp is affixed to heat processing material.

Sales Warehouse

Tamasaki

Kashima

Our company has warehouses with an area of about 15,000m² in Tamasaki (Ichihara) and Kashima. Dedicated managers safely store customer goods and receipt / picking of goods.

Other

- Material sales (PP bands, stretchable film, cardboard, etc.)
- Delivery by shipping agent
- On-site work (packaging, loading/unloading, etc.)

Protecting the environment is our corporate responsibility

Our products use large amount of wood and forest resources.

The majority of these wood resources are harvested from forests in Southeast Asia.

As much as possible, our company protects the environment and engages in management aimed at the recycling of forest resources.

◆ Holding afforestation projects

From 2000, our company has performed onsite (Sumatra, Indonesia) afforestation activities in cooperation with our affiliated company (P.T. Ahlindo). Through these activities, we implement environmental recycling in the process of afforestation → growth → usage. As a corporation that uses forest resources, it is only natural that we perform such activities. It is our corporate social mission to continue these afforestation project into the future. As of August 2005, we have already planted a total of 75,000 trees on land with an area of about 100 hectares.

Region where afforestation is performed

◆ Trees growing strong

Currently, our afforestation activities mainly use two species: teak and mahogany. Both teak and mahogany mature in about 20 to 25 years; however, when considering wood quality, the trees reach their best condition in about 40 to 50 years.

Seedlings before planting

◆ Done for the global environment, not just business resources

Our company does not view forests simply as a source of raw materials. We recognize that forests are the most important part of the global environment.

About two years after planting, mahogany trees grow to a height of approx. 5 meters

Company Overview
